

**RENAULT 5**

Type

Sub-Section

**X40****45****45** CUTTING THE ROOF TO FIT OPTIONAL SUNROOFOther sub-sections concerned: 41 48

Basic manual: MR 258

For this vehicle the parts available from the Parts Department, such as roof panels and complete body, are supplied without the cut-out for the sunroof. When replacing one of these parts, this section will have to be cut out 203 ± 1 mm away from the windscreen frame, along the vehicle centreline.

The template for cutting out this section is identical to the one for the roof fitted as an optional extra and is available under part no. 77 01 034 010.

"The repair methods given by the manufacturer in this document are based on the technical specifications current when it was prepared.

The methods may be modified as a result of changes introduced by the manufacturer in the production of the various component units and accessories from which his vehicles are constructed".

Copying or translating, in part or in full, of this document or use of the service part reference numbering system is forbidden without the prior written authority of the Régie Nationale des Usines Renault.

$X = 203 \pm 1 \text{ mm}$

A = area to be cut away

Y = righthand and lefthand sides must be equal

Attention: dimension X is only valid for limited series vehicles with a sunroof. These cars have special headlining, roof console and sun-visors.

Under no circumstances should this measurement be used for cutting out a section from a roof fitted as an optional extra (for these the measurement is 270 mm).

Use the cardboard template supplied:

- either by the Parts Department under part no.77 01 034 010;
- or with the roof fitted as an optional extra of the same type;

to get the shape of the cut-out section.

The template must be centred in relation to the vehicle centreline (dimension Y) then secured with adhesive tape all around its edge.

The section must be cut out before the vehicle is painted.
