

FURTHER READING & REFERENCES

Not a great deal has been published on the 5 Turbo and its derivatives in English and most literature available is in the form of magazine articles and features. Some have been in the more popular publications eg. Autocar and Car And Car Conversions Etc. but on whole they have appeared in the more obscure magazines, they number in total approx. 100 features to date which includes the US offerings. A huge amount has been written in the French, Belgian, Dutch and German press and these do become available from time to time.

The complete list of reference material includes the following publications, many of which are now out of print.
